OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17.

THE REDCLIFF REVIEW.

THURSDAY, MARCH 15th, 1928

Number 9.

## Nona Rose wins Oratorical Contest

Will Now Meet The Winner From Medicine Hat

Judges at the oratorical contest at the school last Tuesday evening, declared Nona Rose the winner of the contest. The judges were Mr. S. Short of Medicine Hat, Mr. Hargrave and Mr. Baird.

The contestants were Hugh McQuinn, Francis Burkhart, Billy Selhorn, Nona Rose and Tom McElvogue, and they spoke in the order named.

Thespisette put up an excellent showing, each following a set pattern line of argument. They reviewed Canada's past and present progress and development and each had a telling revelation of the possibilities for the future.

There was a good attendance of parents and town officials and all were greatly pleased with the display by the contestants.

Several orations showed that the speakers put considerable time on the preparation for this important contest and dug up much valuable and interesting information about Canada's present position among the nations of the world.

It was our intention to give an account of each address and publish the winner's speech in full, but since the program for this important contest was concluded it has been thought advisable to hold it over for the present.

By winning the contest her Nona Rose has the winner of the contest. The date for this meeting has not yet been set but when it is there should be a good delegation from Redcliff to accompany Nona, and she should be given all the support and assistance possible.

It is no exaggeration to say that all who heard them were proud of the excellent showing made by all the speakers. It is some time since a Redcliff oratorical contest has shown such a splendid display of talent from our school pupils.

Mr. Hector Lang, chairman of the oratorical committee for this contest, was present and acted as chairman. In opening the meeting he referred to the splendid record of the Redcliff school in the past along debating lines. He expressed the hope that they would maintain that reputation. Inspector Carr was also present. While the judges were arriving at their decision he gave an interesting talk on the educational problems of today.

May McVoy found during the film of Warner Brothers' production of "Irish Hearts" in which she acted, that she would not make a good "Irish house" waitress. The dislusive star expressed considerable inconvenience in delivering orders on a rounder which came almost to her shoulder. "Irish Hearts" will be at Dreamland theatre Medicine Hat, next Monday for a run of three days.

## W. E. McCombs is Labor Candidate

Will Contest This Constituency in the Approaching By-Election

AL. W. E. McCombs, of Medicine Hat, was the unanimous choice of the convention held by the Dominion Labor party last Thursday evening, to select a standard bearer to represent Labor in the forthcoming by-election. After several names had been mentioned it was finally decided that just one name would be placed before the convention. The name of Mr. McCombs was then put in and it was declared the unanimously chosen.

## SERVICE TAX PAYERS NOW TO HAVE A VOTE

A bill now before the legislature provides for a change in the Town Act which will give the ratepayers a vote on the right to vote at municipal elections. Sec. 203a is added to the act and says: In any case where the Board of Public Utility Commissioners has imposed a service tax under the provisions of Part IV of the Public Utilities Act, 1921, the secretary-treasurer shall place the names of all persons liable to the payment thereof upon the voters' list.

## Hector Lang is the Liberal Candidate

Was Unanimous Choice of Convention Last Night

At a well attended meeting of the Medicine Hat Provincial Liberal Association, held in the Park Hall last evening, Hector Lang was officially declared as the candidate of the party. Delegates were present from Dunmore, Redcliff and Falm's Lake. On motion of R. C. Blay the endorsement was unanimous.

## Former Redcliff Family Have Narrow Escape

Gas Explodes in Home of Rev. J. F. Cox, Medicine Hat

Their many friends in town were sorry to hear of the accident at the home of Mr. and Mrs. J. F. Cox of Medicine Hat last week end. A fire started from a gas explosion in a room occupied by Mrs. Mayne, an elderly woman who has been staying with them. Mrs. Mayne turned on the gas to light a candle and left it on while she went to get a match. When the match went it lit an explosion followed and Mrs. Mayne was so badly burned she was taken to the hospital where she died Sunday evening. After the explosion Mrs. Cox rushed to the unfortunate woman's assistance and, and strongly supports his claim for the operation of the conventional appearing standard on a gravity principle. Final lamps are used for each of the four sides of the signal changing ed as the screen is removed. The run is attached to light shaft, which is reached through the post of the signal standard at the mechanism below and terminates in a slotted screw.

The model, made by Mr. Barnes, is a complete and carefully finished affair, and strongly supports his claim for the invention. He claims that the device operates the necessary for expensive electric lines to a central master timer, as the Barnes signal can be electrically operated from the nearest ordinary power line and will run indefinitely without attention.

Mr. Barnes was a resident of Redcliff when war broke out and was one of the first who left for overseas as a reservist. He again returned to town and for a time worked at the glass plant before going to Windsor. He is a brother-in-law of R. S. Hodge.

## Churches

**ST. AMBROSE CHURCH**  
Rev. J. L. Coops, R.A., Vicar  
Sunday School, 10 a.m.  
Morning Service, 11 a.m.  
Evening Service, 7:30 p.m.  
Lecture on Prayer Book, Tuesday, Vestry meeting at 8 p.m.  
Thursday, Women's service and address 3 p.m., Teachers' meeting 7:30 p.m., Children's service in the church 4:15 p.m. Evening and address 7:30 p.m.  
Chair practice to be announced. This week as usual.

**GORDON MEMORIAL UNITED CHURCH**  
R. N. Matheson, R.A., Minister.  
Strangers and visitors are very cordially invited to attend the service to be held in the activities of Gordon Memorial church.  
Organizations meet as follows:  
The Official Board on 2nd Tuesday in each quarter at 8 p.m.  
Committee of Stewards on the 2nd Tuesday of each month at 8 p.m.  
Women's Missionary Society on the last Thursday of each month at 8 p.m.  
Ladies' Aid, every Thursday, 8 p.m.  
Mission Band every second Monday at 4:15 p.m.  
Sunday, March 18th.  
10 a.m. Church School.  
11:15 a.m. Public Worship.  
Subject of Trinitarian Mission.  
7:30 p.m. Church Membership class.  
8 p.m. in Evening Service.  
"The Gates of The City."

**CHURCH OF THE BRETHREN**  
Rev. R. H. Hargrave, Minister.  
Usual services.

**BY MARY'S CHURCH**  
Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

## CART OF CHARACTERS FOR "WANTED A WIFE"

The following is the cast of characters for the play, "Wanted A Wife," to be given on Gordon Memorial church on Thursday evening, March 22nd, commencing at 8 o'clock. Admission, adults 50c, children 25c. Tickets on sale at E. T. Cook's and C. T. Hall's. Richard Wilkins—E. T. Cook. Jacob Flint—Howard Duffield. Petunia—Nannie Learmonth. Vera—Annette Martin. Esther—Peggie Paulson. Grandmother—Margaret Moore. Jane—Eve Pinder. Father—Billy Palmer. Mother—Mrs. Sheldon. Mabel—Miss McQuinn. Jack—Tom McElvogue. Maudie—Mrs. Thacker and Martha Palmer.

## Former Redcliff Man Invents Traffic Sign

Lionel Barnes Has New Signal Based On New Principle

The Border City Star, of Windsor, Ont., has this day following to say about a new invention by Lionel Barnes, a one time resident of Redcliff.

"Canadian and United States papers for a street traffic signal, operating on a new principle, have been granted to Lionel Barnes, an employee of the Hydro here."

Mr. Barnes' device, as demonstrated in a working model standing some five feet in height, provides for the operation of the conventional appearing standard on a gravity principle. Final lamps are used for each of the four sides of the signal changing ed as the screen is removed. The run is attached to light shaft, which is reached through the post of the signal standard at the mechanism below and terminates in a slotted screw.

The model, made by Mr. Barnes, is a complete and carefully finished affair, and strongly supports his claim for the invention. He claims that the device operates the necessary for expensive electric lines to a central master timer, as the Barnes signal can be electrically operated from the nearest ordinary power line and will run indefinitely without attention.

Mr. Barnes was a resident of Redcliff when war broke out and was one of the first who left for overseas as a reservist. He again returned to town and for a time worked at the glass plant before going to Windsor. He is a brother-in-law of R. S. Hodge.

## SMAMPEDE MEETING

The annual general meeting of the Redcliff Smampede Association will be held in the Legion reading room on Tuesday evening, March 20th at 8 o'clock, for the purpose of re-organizing for the season. Attendance is urgently requested.

N. D'ACRE, President

## Well Known Rancher of District Died

Don Newton, of Box Springs District, Died Yesterday

Don Newton, a well known rancher north of Box Springs, died of cancer Wednesday night in the Medicine Hat hospital where he had been a patient for the past few weeks.

Mr. Newton was born at Chipewyan, Falls, Ont. in 1860 and came to the Hat in 1918 when he purchased the Penseck outfit, later adding the Allison brand to his holdings. He recently sold half of his holdings, including the Drowning Pond ranch to Mary Miner, of Medicine Hat.

At the time of going to press the funeral arrangements had not been made.

## New Offer For Alberta Railways

C. P. R. and C. N. R. Now Offer to Start Intersect West Year

An amended joint offer from the Canadian Pacific Railway and the Canadian National Railway, for Edmonton, Dunsmuir and British Columbia provincial railway, including the Central Canada line, has been received by the general government.

The gist of the new offer is that the two transcontinental now offer to allow interest to commence on January 1st, 1929, on the full amount of \$5,000,000 agreed to be paid for the capital stock of the northern lines in the previous offer.

In the previous offer, the interest was to commence on July 1st, 1928, and on only one million dollars, interest to be paid on an additional million.

In addition the new offer from the transcontinental states they are prepared to undertake during the next five years 100 miles of branch line and extensions will be constructed, including the forty miles mentioned in the previous proposal.

## Successful Smoker By Local Leagon

Officers From Medicine Hat Legion Are Present

Used mostly, pithy speeches, funny stories and a jolly crowd characterized the smoker in the Legion club rooms last Friday evening. There was a good crowd in attendance and all pronounced it one of the most successful events of its kind for some time. President McQuinn, vice Pres. F. McQuinn, D. Gilligan and C. S. McGuire, of the Medicine Hat branch, were guests of honor.

During the evening all who could sing, danced, told a story, made speech or play the mouth organ were called upon, thus furnishing a very well balanced program.

Mayor Werts welcomed the visitors. He also spoke of the position held by the Legion throughout the Dominion and assured members of the local branch of the support and co-operation of the council and citizens generally in any movement they might undertake which had for its object the bettering of the community spirit and the betterment of the community.

President McQuinn, of the Medicine Hat branch, brought greetings from his branch. He emphasized the necessity of co-operation between the two branches. Mr. McQuinn spoke of the fundamentals for which the Legion stood and reviewed many of the acts performed by the Legion in the interests of men who suffered disabilities overseas.

President Trotter, of the local branch, thanked the visitors and local members for the interest and co-operation shown the Legion here and expressed the hope that the branch would continue to work for the betterment of all members.

H. J. Bost expressed the opinion that, because active members of the Legion were, as a result of their experience overseas, able to appreciate more for their worth, and had learned something of the advantages of working together, the Legion should be the center of all movements for the betterment of the community.

This successful smoker closed with the singing of the national anthem.

## Council Sets More Town Buildings

Deals, Closed For Six or Three More At Last Monday

At the council meeting last Monday evening deals were closed for the sale of four more houses in town, to local citizens. Edward Ellis purchased a house on Fifth street, H. Johnson a house on Second street and L. Morley a house on First street. Besides these, several inquiries for prices on houses and lots were submitted to council, all of which were referred to the building committee to investigate.

Beyond the passing of the usual accounts and the reading of communications very little other business of importance was transacted.

The number of inquiries now being made for houses and lots by citizens, and the number of sales consummated during the past month are most encouraging signs. They show that as in reading number of our citizens are now desirous of owning their own homes. This in turn will give the town a more stable standing, will mean an increase in our live assessment and, consequently an increase in our tax receipts from year to year. It will also mean a big improvement in the appearance of our town as the buildings being purchased will be renovated and the grounds surrounding them improved in appearance.

The coming summer would be a good time to start some kind of a movement for a competition along the line of beautifying the homes.

## Joint Lodges Have Successful Social

Will Give another on March 18th—Open to the Public

Although the crowd at the which dinner and dance given under the auspices of the joint lodges in town last Thursday evening, was not as large as was expected, it was pronounced by all as being one of the best socials of its kind held here for some time. All were warmly to each other and all entered heartily into the spirit of the occasion, making it appear more like a big house party. Ken Interest was shown in the whist drive, and when the valley cards were snuffed it was found that Mr. A. Debus had won his fancy draw length which was the ladies' first prize. W. West won the gent's prize which was a set of fancy hose supporters and a fancy holder. The consolation went to Miss Lorr-mouth and H. Jenks.

Dancing followed, and as the music was excellent and the crowd in good fettle, all spent a pleasant social hour or so. Both young and old got quite a kick out of the square dances called off by Mayor Werts.

The committee in charge of both cards and dancing were highly pleased for the capable manner in which the event was conducted. During the evening refreshments were served by H. Champ in his usual good style.

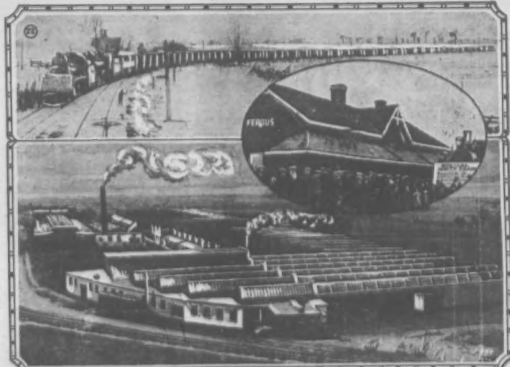

The joint lodges are putting on a similar social tomorrow (Friday) evening to which the public is invited. For a real, wholesome, pleasant evening don't miss this one.

## Conservatives Call Meeting For Friday

Will Be Held in Medicine Hat at 8 O'clock in The Evening

The Conservative Association for the provincial constituency of Medicine Hat, is calling a convention to be held in the city on Friday evening of this week at eight o'clock. The main object is to select a candidate for the approaching by-election for this constituency, which will likely be held some time towards the end of the month. As Redcliff is part of that constituency, and since the convention is open to all Conservatives, it is requested that there be a good delegation from here.

## Cleaning up the West

Under the C.P.R. plan of 15 men carrying the record shipment of washing machines and pump sets to be made in Canada. Last week's ship of 15 men carrying the record shipment of washing machines and pump sets to be made in Canada. Last week's ship of 15 men carrying the record shipment of washing machines and pump sets to be made in Canada.

Large, a little Ontario town of 2,500 people is making a large contribution to the cleaning up of the West. Recently the whole community turned out to see the despatch of a special train of 25 cars, double-headed with motor power for the West. The largest consignment of washing machines and pumps ever to be made in Canada. There were 15,000 washing machines and 15,000 pumps. The large number of pumps going forward suggests that the Western farmer has decided to carry no more water if his housekeeper will do no more washing.

## May Be Important Discovery

The Deposits Likely To Enhance Canada's Prestige As Mineral Country

There has been discovered in Northern Ontario, near Sault Ste. Marie, the line of the Transcanadian and Northern Ontario Railway, and if the deposits prove up to the expectations of the companies which have been exploring them, Canada's prestige as one of the great mineral countries in the world will be enhanced.

Although tin is such an extremely valuable metal there are only a few regions of the world in which it is found in sufficient quantity to repay the mining. It was tin which brought the Romans from Gaul to Britain, and Cornwall is still a producing field, though on a smaller scale than formerly. There are deposits in North Carolina, South Dakota, Tennessee and California, but they are probably of little importance or they would have been worked earlier, especially during the Civil War. The deposits for tin in so great and the known resources so limited in extent that there may soon be a shortage. If our discoveries prove up to the market the increase is likely to be counteracted by the stimulation of worked-out areas. Britain until recently produced about 40 per cent of the world's supply, but a decline in production is predicted and there appears to be a definite limit to the tin belt which runs from Burma through Malaysia to the Dutch East Indies. Although every effort is being made to meet present demands, world production is not much greater than it was before the war.

The British Empire, with its production from Malaya, Sumatra, Nigeria, South Africa, Australia and Cornwall, already contributes 40 per cent of the world's output. If Ontario tin should make up its share of the prospects, the British Empire might control the market of the world. As Sir John G. Macdonald, president of the recent tin-mining conference in Canada, has pointed out, the Empire already has practically a monopoly of supplies. "We have built up a large tin smelting industry capable of treating not only British ore but those of Bolivia and the Dutch East Indies, so that the control of the marketing of tin has in effect become a British monopoly. Our smelters turning out some 80 per cent of the world's supplies." Ontario's tin may therefore be a factor in giving the British Empire a complete monopoly of this important metal.

## Big Production Of Alberta Coal

15 Per Cent Of The Available Coal Reserve In The World Is In Alberta

Coal production in the province of Alberta during 1927 has reached a new high level of output reaching for all grades 6,204,750 tons. This production exceeds that of the previous year, 1926, by 77,857 tons and sets a new high mark in the history of the development of Alberta's coal mines. It is estimated that 10 per cent of the available coal reserve of the world is in Alberta. Of the actual reserve, calculated by the government, more than three million tons are semi-anthracite or high carbon bituminous.

## Experiment With Eggs

Relation Of Water Proportion To The Hatching Quality Of Eggs

An interesting investigation has been made at the Rte. Anne de la Providence Experimental Station to ascertain whether hens with high production of eggs with high water production produce the better eggs from the hatching point of view. In this particular experiment the eggs of low producing hens proved to be the best. It required an average of 3.5 of their eggs to produce one wing band against 2.5 of the eggs of the high producing hens.

## Vietnam Cheese Makers

James Crawford, of Woodstock, Ont., the oldest living pioneer of the cheese industry in Canada celebrated his eighty-sixth birthday recently and is to be the enjoyment of excellent health. Mr. Crawford is one of those who made a cheese weighing 2½ tons which, in 1904, was sent to England as a present to introducing the Canadian product into the English market.

## Interchangeable Railway Trucks

A bill providing that return trucks owned by railway companies shall be made interchangeable will be introduced in the House of Commons this session by Mr. W. J. Maclean, Liberal. The measure is a compromise with a rule prevailing in England and Scotland.

W. N. O. 1730

## Women As Taxi Drivers

Great Number Are Making Good In New York

With a draft chassis the car pulled down over brown curls the driver of the taxi cab. She put away a lipstick and brightly acknowledged the customer's directions. She started the cab and skillfully piloted it through dense traffic. She stopped in front of the address she had been given, opened the door for the fare, and with a matter-of-fact "Thank-you" accepted the proffered tip.

Her license card identified her as Jonette Wing, one of the women who today are registered at the police department as licensed taxi drivers. Since the first woman driver applied for her license in 1914, the field has become crowded. "We treat them just like men," explained a policeman. "They have to take exactly the same tests that the men do, pass the same tests, and suffer just the same punishment if they violate any of the license rules."

## Hog Cholera Outbreak

Disease Reported In North Dakota Near International Boundary

A serious outbreak of hog cholera has been reported near the international boundary in North Dakota. One farmer seven miles south of Bismarck border lost all his hogs and another almost on the border lost several. Every precaution is being taken to prevent the spread of the disease to other farms in North Dakota and in Saskatchewan. Fews are being kept off the infected farms, and to have any hogs in being added to ever his hogs inoculated at once.

## Grain Yields Of Prairie Provinces

The total grain yields in 1927 of the three Prairie Provinces, Manitoba, Saskatchewan, and Alberta, are estimated as follows: wheat, 41,910,000 bushels from 21,625,000 acres; oats, 202,000,000 bushels from 8,205,087 acres; barley, 73,964,000 bushels from 2,338,346 acres; rye, 13,297,000 bushels from 601,139 acres; flaxseed, 4,776,000 bushels from 466,431 acres.

Atmospheric pressure on their nerves enables birds to know coming weather changes.

It is easy to remove a dog's hair veterinarian demonstrated in a Portland, Ore., clinic recently.

## Dominion Wheat Exports

Canada Exports Wheat and Flour To 45 Countries

Wheat and flour were exported from Canada in 1927 to 45 countries, the total amounts being 231,268,780 bushels of wheat and 2,847,224 barrels of flour. The British Isles took 180,346,710 bushels of Canadian wheat, or two-thirds of the total exported, and 3,315,433 barrels of flour more than one-third of the aggregate sent to all countries.

Italy was the Dominion's next best customer in wheat with 12,000,798 bushels; Belgium third with 10,337,700 bushels; Japan fourth with 7,994,715; Germany fifth with 7,764,898 bushels, and the United States sixth with 7,624,508 bushels. The other purchasers of Canadian wheat are widely scattered throughout the world.

Germany was second in the list of consumers for flour with 1,002,943 barrels. South America was third with 1,002,943 barrels, China fourth with 506,408 barrels; Newfoundland fifth with 500,744 barrels; the Irish Free State sixth with 227,000 barrels; Trinidad and Tobago, in the British West Indies, bought only eight bushels of Canadian wheat last year. The French islands of St. Pierre and Miquelon in the North Atlantic bought 27 bushels of wheat, and 6,132 barrels of flour.

The wheat crop of Canada in 1927 totaled 44,982,000 bushels, the second largest crop Canada has reaped and the second largest crop grown by any one country in that year. In 1927 the wheat exports of the Dominion were larger than those of any other country.

## Believed In Brevity

Although the word kept around a lot last week—and two people say they heard it years ago—anyhow—we will report that two business men of the garment industry were overheard in an animated conversation on a bus top. Finally one of them paused and demanded: "Well, what do you think of my new suit?"

"I tell you in two words," said his associate. "Impossible."

"Baby"—Do cannabals go to heaven?"

"Mother"—Why, no."

"Baby"—But will he fit at the missionary?"

## CARE OF HOUSE PLANTS

Excessive Heat and Too Much Water Should Be Guarded Against

Even house plants seem to have their fads and dislikes. For some folk they grow and thrive, while for others they always seem to "sail" and wither. Housewives who have been having trouble with them will be glad to know that these successful folk possess no mysterious recipe for caring for plants. They simply know the best conditions for growing them, and avoid giving them too much water or keeping them in too warm rooms. There are two common causes of "high mortality" among house plants listed by G. O. Moore, head of the horticultural department of the Wisconsin College of Agriculture.

The best temperature for growing most house plants, he says, is 60 to 65 degrees. Although this is slightly too cool for the family's comfort, the plants may be kept in the coolest part of the room in which they are growing, especially if they are blooming. The blossoms keep fresh much longer when the temperature is low.

Mr. Moore says water-pot plants prosper because the air is forced out of the waterlogged soil. He has three simple tests which, if the plant has been properly watered, will indicate whether it needs watering—(1) the light when the side of the pot is felt, (2) a light color to the surface soil or the tendency of the surface soil to crumble into a powdery form when rubbed between the thumb and fingers. (3) the plant may be tipped out of the pot and the soil examined.

When watering plants one should make a job of it and then let it go until they need it again. In order that any extra water may drain out of the pot easily, he advises putting pieces of broken pot or other drainage material in the bottom of the pot and covering them with moss. Strictly forbid the idea to keep the plants from washing into it.

## Many Miles Of Roads

Since 1919, 8,412 miles of roads have been built in different parts of Canada under the Canada Highways Act. The latest contract shows a total road mileage of 64,924 maintained by a patrol or gang system at an annual expense of \$19,976,000.

## SATS STEAM ENGINE

NOT WATT'S INVENTION

Were Constructed Thirty Years Before He Was Born

James Watt was not the inventor of the steam engine, according to Prof. Edward Neville de Costa Anderson, professor of physics in the Artillery College, Woolwich, who made this statement in a lecture at the Royal Institution on "Engines."

"Prof. Anderson said: 'It is often stated that James Watt (1736-1819) invented the steam engine, but this is quite untrue. More than 30 years before Watt was born both Savery (Captain Thomas Savery, military engineer) and Newcomen (Thomas Newcomen, English engineer) constructed steam engines which were actually used for pumping.'"

Prof. Anderson showed a working model of Savery's engine, which sucked up the water into a vessel by the condensation of steam, and then drove the water up from that vessel by the pressure of steam. Newcomen used this principle, he said, but improved it by using a cylinder and piston. The engine worked by causing a vacuum under the piston, which was driven down by atmospheric pressure.

"Prof. Anderson said: 'The engine worked by causing a vacuum under the piston, which was driven down by atmospheric pressure. The engine worked by causing a vacuum under the piston, which was driven down by atmospheric pressure. The engine worked by causing a vacuum under the piston, which was driven down by atmospheric pressure.'"

"It is bound to be a costly work," says the professor, "but the expenditure is not worth considering in comparison with the results which will accrue for the whole of Australia from the discovery of even one principle of nutrition which previously was not known."

## Barley Or Corn For Laying Pullets

Corn Is Preferable To Barley For Eggs Production

An experiment to test the relative value of barley and corn as ingredients in the scratch grain and mash for laying pullets has been carried out by the University of Alberta, Lethbridge, Alberta, Experimental Farm. The results of the test, which are summarized in the table, are in favor of feeding corn rather than barley both for egg production and vitality of the birds. In the season in question the amount of barley or corn fed was one-fifth of the total feed consumed. In the 1925-26 season the corn or barley were added to the basic rations from the time the chicks were placed in the hatchery pens in the fall. The results were similar to those of the previous year. The pullets in the barley-fed pens were not nearly as thrifty as those in the corn-fed pens. Several clutches of egg production were laid especially in January and February. After March 1st the barley fed clutches were again the best, which resulted in a great improvement in the health of the birds and a return to normal laying.

The finger of Watt governs speed and smooth playing of the record of the latest piece of dance music, which may command his memory to man when his engineering achievements no appear."

## For Salvaging Submarines

Winnipeg Inventor Has Device For Raising Sunk Sub

J. A. Conn, of Winnipeg, has invented a device for rescuing and salvaging of submarines. It was learned when he announced the plans and models of the invention had been placed before the bureau of construction and repairs of the United States Navy Department at Washington, D.C.

Although discreet as to details, Conn was convinced the victims of the recent 8-6 submarine disaster could be rescued and the brought to the surface half an hour after the mishap had his device been used. He said he was not a member of the United States Navy Department, the plans and models are going to be submitted to a special board to be reported to the navy. Further investigation as to the practicability of the device.

## Principal Wheat Exporting Country

Though less than 33 per cent of the population of Canada are engaged in farming, it is estimated that over 38 per cent of the national wealth is attributed to agriculture, the basic industry of the Dominion. Less than one-fifth of the 300,000,000 acres of land available for farming in Canada is under cultivation, yet Canada is the world's second greatest producer of wheat and oats and the principal wheat exporting country.

## Fernette Plant Trees

New settlers in the Vauxhall district of Alberta planted 27,000 trees during 1927. Trees planted by earlier settlers in 1929 and 1931 have already developed to small forests and will be a new feature of the landscape to beautify their farms.

## Would Lead As Wool Producer

Australian Professor's Research Work Will Last For Seven Years

Already the leading country in the world in wool production, Australia is determined not only to maintain her position, but to make her wool production to lightens her grip. It is computed that her sheep produce an average of 2½ lb. per head more than those of any other country. Research is now being undertaken is expected to increase the yield still further. Professor Reginald Robinson of Adelaide University, who has been engaged for the last fourteen years in research work here and in the United States. It is regarded the growth and nutrition of sheep, is in charge of the present research, which is being carried out under the inspiration and with the finances of the Federal Council of Scientific and Industrial Research. His work is expected to last seven years.

At the end of last year Professor Robinson had completed a preliminary investigation into matters affecting the nutrition of sheep and to acquire himself with the problems encountered in the production of wool. He undertook a tour of the most important sheep areas. This has enabled him to make a preliminary knowledge of the type of problem which he and his assistants intend to meet.

Laboratory work will be conducted by the professor and his research assistants is expected to yield results in a few years which will take the place of the present knowledge of close study and observation to complete.

"It is bound to be a costly work," says the professor, "but the expenditure is not worth considering in comparison with the results which will accrue for the whole of Australia from the discovery of even one principle of nutrition which previously was not known."

## Barley Or Corn For Laying Pullets

Corn Is Preferable To Barley For Eggs Production

An experiment to test the relative value of barley and corn as ingredients in the scratch grain and mash for laying pullets has been carried out by the University of Alberta, Lethbridge, Alberta, Experimental Farm. The results of the test, which are summarized in the table, are in favor of feeding corn rather than barley both for egg production and vitality of the birds. In the 1925-26 season the corn or barley were added to the basic rations from the time the chicks were placed in the hatchery pens in the fall. The results were similar to those of the previous year. The pullets in the barley-fed pens were not nearly as thrifty as those in the corn-fed pens. Several clutches of egg production were laid especially in January and February. After March 1st the barley fed clutches were again the best, which resulted in a great improvement in the health of the birds and a return to normal laying.

The finger of Watt governs speed and smooth playing of the record of the latest piece of dance music, which may command his memory to man when his engineering achievements no appear."

## For Salvaging Submarines

Winnipeg Inventor Has Device For Raising Sunk Sub

J. A. Conn, of Winnipeg, has invented a device for rescuing and salvaging of submarines. It was learned when he announced the plans and models of the invention had been placed before the bureau of construction and repairs of the United States Navy Department at Washington, D.C.

Although discreet as to details, Conn was convinced the victims of the recent 8-6 submarine disaster could be rescued and the brought to the surface half an hour after the mishap had his device been used. He said he was not a member of the United States Navy Department, the plans and models are going to be submitted to a special board to be reported to the navy. Further investigation as to the practicability of the device.

## Principal Wheat Exporting Country

Though less than 33 per cent of the population of Canada are engaged in farming, it is estimated that over 38 per cent of the national wealth is attributed to agriculture, the basic industry of the Dominion. Less than one-fifth of the 300,000,000 acres of land available for farming in Canada is under cultivation, yet Canada is the world's second greatest producer of wheat and oats and the principal wheat exporting country.

## Fernette Plant Trees

New settlers in the Vauxhall district of Alberta planted 27,000 trees during 1927. Trees planted by earlier settlers in 1929 and 1931 have already developed to small forests and will be a new feature of the landscape to beautify their farms.

## Throwing a Lot of Light on a Dark Continent

RHODES MEMORIAL AT JOHANNESBURG

AFRICAN DETRIMENT PARK

NATIVE DANCERS, JOHANNESBURG

of the world's American's gold rush of 1927. The Rhodes Memorial in Johannesburg is a monument to the life of Cecil Rhodes, a British statesman and mining magnate. The memorial is a large, white, classical-style building with a central dome and four towers. It is surrounded by a large, open area of land, which is now a park. The park is home to many native animals, including lions, elephants, and giraffes. The memorial is a popular tourist attraction, and it is a place where many people come to learn about the life of Cecil Rhodes and the history of South Africa.

them. This is a pleasure in store for the future. The Rhodes Memorial in Johannesburg is a monument to the life of Cecil Rhodes, a British statesman and mining magnate. dances were played the majority resented.

The general monthly meeting of the local Legion will be held in the Club rooms next Sunday afternoon at three o'clock.

A gang of men are now busy tearing down the old rolling mill buildings here. The building and contents were recently sold to a Winnipeg firm and it is the intention of the new owners to move all to another point.

Miss Florence Jack a member of the West China Mission staff since 1915, now home in Canada because of the disturbed conditions in China, will address the ladies of Gordon Memorial church on Friday afternoon at three o'clock. In order that as many as possible may have the opportunity of hearing Miss Jack, the Ladies' Aid will hold their regular meeting on Friday afternoon.

"Africa and her People" was the subject of a very interesting address in the Gordon Memorial on Sunday evening. The address was illustrated by many beautiful colored slides. The pictures furnished more convincing proof than any argument could have done of the contribution christianity is making in the lives of the people and the wellbeing of society. The Canadian mission was opened forty years ago by the former Congregational church and is situated in the province of Anagwa, West Africa, about 500 miles from the coast. The people here responding to the appeal of the christian faith, even if it means a complete change in their method of living and whole outlook upon life.
